

# OrgPublisher 10.1 Specifications Sheet

## Charting and Graphing

<b>Extensive Graph and Chart Options</b>	Create multiple chart and graph views with different detail and summary information to easily see KPIs and HCM metrics
<b>Visual Report Filtering</b>	Make visualizing search results easier for ad-hoc reporting by showing only the individuals and their associated chain of command that result from the search
<b>Cross-Browser Publishing</b>	View charts across multiple browsers and operating systems using built-in Microsoft® Silverlight functionality
<b>Enhanced Employee Profiles</b>	Organize more information about each employee in profile views with tabbed displays
<b>Role-Based Toolbars and Chart Views</b>	Pre-define corporate roles to designate access levels and available actions for easy administrative set-up
<b>Simple and Advanced Search</b>	Use Simple Search for quick, basic data searches or Advanced Search to get detailed search-within-a-search results for user-defined reports
<b>Intelligent Search</b>	Search more efficiently using a customizable semantic dictionary that returns all similar results that pertain to your search
<b>Automatic Groups</b>	Administrators can automatically create groups based on field values and organize group queries into logical categories to easily create ad-hoc reports
<b>Configurable Styles</b>	Use separate tabs to quickly access and view multiple HR metrics and create multiple reports
<b>Reporting Relationships</b>	Easily view all reporting relationships including person-to-person, position-to-position and matrix reporting; also view chain of command and indirect reporting relationships
<b>Publishing Wizard</b>	Publish charts for workforce reporting with only two clicks
<b>Style Wizards</b>	Define report contents and formats using professionally-designed chart templates for daily workforce reporting
<b>Optimized Chart Layout</b>	Use Preview pane to easily select optimal chart layouts to satisfy particular printing needs; one-page, book-style formatting, etc.

## Analysis

<b>Search and Groups</b>	Access pre-defined queries and powerful ad-hoc search tools using search and reporting capabilities, allow administrators to automatically create groups based on field values
<b>Group Categories</b>	Organize group queries into logical categories to create ad-hoc reports faster (i.e., place sub-groups Texas, New York and Alaska into a larger category called "States")
<b>Summary Engine</b>	Easily generate workforce analytics and organizational statistics such as headcounts, open positions, etc.
<b>Hover Profile</b>	Mouse over specific boxes to view detailed information about a person or position, also view pop-up information windows for rapid analysis
<b>Smart Links</b>	Create hotspots to link directly to additional information sources such as documents, applications, etc.
<b>Headcount and Metrics Roll-up</b>	Roll up key business metrics within the hierarchy for easy analysis in headcount and other daily reports
<b>OrgHistory™ Chart Archiving and Analysis</b>	Automatically generate historical organizational archives and view change reports to see what has changed over time

## Security

<b>Role-Based</b>	Grant access to sensitive data based on role within the company
<b>Hierarchy-Based</b>	Control data access based on hierarchy levels
<b>User Authentication</b>	Permit log-ons via Web-based, form-based and single sign-on (SSO) capability

## OrgPublisher 10.1 System Administrator Features

- Administer in Web-based environment
- Choose SaaS (includes Secure FTP) or On-Premise options
- Utilize security features including single sign-on and granular data access control
- Gain cross-browser viewing support for thin client viewing via Microsoft Silverlight functionality
- Access browser-based viewing options with thin client (zero install) and rich client (Active-X plug-in) options
- Combine data from multiple Enterprise sources (including relational databases, XML, CSV, LDAP/Active Directory, etc.) into a single report
- Access data using real-time and/or scheduled batch data transfers
- Use API included in developer's kit for simple integrations
- Easily transfer charts to Microsoft® PowerPoint, Excel and PDF
- Receive system administrator notifications for recursion or broken hierarchies
- Choose localized versions in French, German, Italian, Portuguese, Spanish, or Dutch
- Benefit from Unicode support to view multiple languages within a chart, including non-Western characters
- Publish charts that can be viewed in supported localized languages
